

# FLUENCY PRACTICE: Systems of Equations: Elimination A

Name: \_\_\_\_\_

Period: \_\_\_\_\_

**Directions:** Find the intersection of each pair of equations by using elimination. **Show all work!!!**

1.  $4x - 3y = 17$   
 $2x + 3y = 13$

2.  $3x + 4y = 10$   
 $8x + 4y = 0$

3.  $3x - 2y = 13$   
 $7x - 2y = 17$

4.  $2x + 5y = 16$   
 $2x + 3y = 12$

5.  $x - 3y = 1$   
 $5x + 3y = 41$

6.  $6x - y = -23$   
 $6x + y = -13$

7.  $4x + 3y = -25$   
 $4x - 3y = -7$

8.  $x + 5y = 19$   
 $3x + 5y = -3$

9.  $2x + 3y = 21$   
 $4x - 3y = 15$

10.  $5x + 2y = 27$   
 $5x - 7y = -27$
